

Brief CV

Name	CHEN Yanhui	中文名	湛炎辉	
Gender	Man	Country	China	
Title	Prof.	Position	Vice President	
University/Department	Guangxi University of Science and Technology / School of Mechanical Engineering			
Research Area	Modular design			
<p>Brief introduction of your research experience:</p> <p>CHEN Yan-hui: born in Anhua Hunan, obtained his Ph. D. degree in Engineering from Xidian University. He is currently a director of the School of mechanical engineering of Guangxi University of science and technology. His main research interests include the modular design of electromechanical products and the top-down design of construction machinery. He has published more than 60 papers in the core journals such as Computer Integrated Manufacturing Systems, China Mechanical Engineering, etc, which has been tagged more than 10 times by EI. He has attained the authorized country invention patent 4 items. Dr. Chen has received the 3rd Prize of Guangxi Science and Technology Progress Award in 2013 and the 2nd Prize of Liuzhou Science and Technology Progress Award in 2012. He has conducted and is conducting more than 20 research projects such as National High-tech R&D Program of China (863 Program), National Key Technologies R & D Program of China and Scientific and Technological Project in Guangxi. In the field of the development of special machinery and the modular design of electromechanical products in complex has made more prominent research achievements.</p>
